Dr. Peter Shanahan, P.E.
HydroAnalysis, Inc.
481 Great Road, Suite 3
Acton, Massachusetts 01720

Dear Dr. Shanahan,

Enclosed is a compact disk containing all the files used to develop and describe EPA Region 10's Columbia River Temperature Assessment: Simulation Methods. Files in the folder diska were created with the Linux operating systems using RedHat 6.0. The original files were archived using the Unix utility tar and the archived files compressed using the Unix utility gzip. The files in the other folders were created in Windows 95/98 and compressed using the utility WinZip.

You can contact me by phone at (206) 553-1532 or e-mail at yearsley.john@epa.gov if you have questions.

Sincerely,

John Yearsley
Environmental Scientist
